

Partnering with Roseman Labs

Roseman Labs delivers the world's fastest and most user-friendly encrypted computing platform, designed to unlock AI's full potential while securing the world's most sensitive data.

Trusted by **150+ organizations** across Healthcare, Government, and Financial Services, our platform solves real-world challenges while upholding the highest security and compliance standards.

By **encrypting, linking, and analyzing** data across silos, Roseman Labs allows organizations to securely combine information from various sources, even when data is strictly private or confidential.

The platform also enables **AI to be trained** and applied without ever exposing sensitive information, enabling **data-driven insights**.

Roseman Labs

Proven Impact

Roseman Labs fuels health and healthcare innovation, by powering **federated data** initiatives around **child safety and abuse**, the prevention of **chronic disease complications**, and nation-wide solutions for secondary health data access and policy evaluation.

Roseman Labs also protects intellectual property and confidentiality, enabling use of **pharmaceutical prescription data, medical device data and proprietary predictive models**.

"With Roseman Labs we solve a long-standing privacy problem that until now has really limited our ability to improve care for children in vulnerable situations."

Eline van den Heuvel, Paediatrician UMC Utrecht

"It's fast, it's safe, it's accurate. We get the insights we need to help our citizens, without ever seeing their personal data."

Ako Madomi, Product Owner Rotterdam Municipality

Working with data in healthcare is often made so complicated and time consuming. Roseman Labs makes it fast and easy to conduct targeted healthcare research."

Femke van den Wall Bake, Project leader NVvP

Roseman Labs

How it works

Setting up an encrypted dataspace is easy with Roseman Labs' SaaS solution. **Invite collaborators, request data and manage approvals** in a user-friendly web platform.

Data engineers and analysts have access to **50+ ready-to-use analysis functions** ranging from basic data operations to **machine learning and AI models**.

Roseman Labs **seamlessly integrates with** existing infrastructure, to ensure that organizations can harness the power of our platform without disrupting their current workflows.

Invite collaborators with a shared goal

Encrypt data at the source

Send analysis request to data owners

Receive approval & run your analysis

Make impact with insights from real world data

Roseman Labs

Collaborative innovation

Partner with Roseman Labs to deliver **encrypted data spaces** for healthcare organizations. Together, we **unlock insights from sensitive data** that would otherwise remain inaccessible.

Roseman Labs partnerships drive critical care innovations based on **real world evidence**, enabling the evaluation and prediction of patient outcomes across the entire chain of care. With **proven security guarantees** and a **robust compliance framework**, the solution meets the strictest privacy & compliance standards.

Designed for both **reporting and research**, the platform offers medical organizations a secure and efficient way to **meet growing data-sharing** and **reporting requirements**.

With **state-of-the-art**, quantum-resistant cryptography, Roseman Labs positions itself as a **future-ready provider** of secure healthcare data collaboration.

Drive innovation with real world evidence

Enhanced data availability for research and reporting
